PUBLICATION OFFICE: Prince & Lemon Sts., Lancaster, Pa. 17604.

EDITORIAL OFFICE: Washington, D. C. **P.O. ADDRESS:** Box 1736, Washington, D. C. 20013. Telephone LIncoln 6–6734.

ADMINISTRATIVE OFFICE: American Meteorological Society, Office of Executive Secretary, 45 Beacon Street, Boston, Mass. 02108.

Address all business communications, orders and inquiries to the Executive Secretary, Mr. Kenneth C. Spengler, 45 Beacon Street, Boston 8, Mass. Exchanges and reprints may be sent direct to P. O. Box 1736, Washington 13, D. C.

METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS is a monthly publication devoted to current abstracts in English on important meteorological and geoastrophysical literature in every language.

SUBSCRIPTION RATE: $90.00. Special rate for university and U. S. Public libraries, $50.00. $20.00 to AMS members. Prices for single copies, $10.00 ($5.00 to members). Back volumes, $50.00 ($20.00 to members). Vols. 1–10, complete, $200 ($100 to members). Second class postage paid at Lancaster, Pa.

Cumulative Author and Subject Indexes

(Vol. 16, No. 1–12)

Jan.–Dec. 1965

(For complete table of contents see back cover)

Published monthly at Prince and Lemon Streets, Lancaster, Pa., by the AMERICAN METEOROLOGICAL SOCIETY, 45 Beacon Street, Boston, Mass. 02108.

Printed and issued by: Lancaster Press, Inc.

ERRATA—VOLUME 16, 1965

Note: In the following list only more important errors are included. Discrepancies in style, punctuation, accents, capitalization, subject headings, etc., are not, as a rule, listed; nor are errors in the monthly indexes of each issue where these errors are corrected in this volume index. Errors of fact which have come to our attention, mistakes in spelling of the names of authors, and errors in title, journal entries or pagination are included. Any errors which have been overlooked should be called to our attention (by post card, addressed to: **Meteorological and Geoastrophysical Abstracts**, Box 1736, Washington, D. C. 20013).

No. 1. p. 22, *item* 16.1–64, *line* 1, *change* van der Ham, D. J. *to* van der Ham, C. J.
p. 64, *item* 16.1–199, *line* 5, *insert* ≠ at (≠ directional convergence) and diffluence (≠ directional divergence)
p. 90, *item* 16.1–283, *line* 1, *change* Bouëtt *to* Bouët
p. 112, *item* 16.1–355, *line* 1, *change* snezhye *to* snezhnye
p. 113, *item* 16.1–356, *line* 1, *change* Systinskiĭ *to* Sytinskiĭ
p. 154, *item* 16.1–492, *line* 1, *change* Broderick *to* Brodrick

No. 2. p. 265, *item* 16.2–276, *line* 1, *change* Chen, Chiu-shih *to* Chen, Chu-shih
p. 294, *item* 16.2–361, *line* 1, *change* Richerche *to* Ricerche

No. 3. p. 410, *item* 16.3–5, *line* 6, *change* phenomenas *to* phenomena
p. 436, *item* 16.4–90, *line* 1, *change* Weille, G. A. de *to* de Weille, G. A.
p. 460, *line* 8, *change* Kazakh *to* Kirghiz
p. 505, *item* 16.3–315, *change* S.H. No. 5 *to read:* Turkestan-Shengel'dy region, Kazakh S.S.R.
p. 595, *line* 7, *change* Straits *to* Strait
p. 615, *item* 16.3–690, *line* 12, *delete* Argus Island

No. 4. p. 689, *item* 16.4–174, *change* Anderson *to* Andersson
p. 718, *item* 16.4–271, *line* 2, *change* Invarienten *to* Invarianten
p. 734, *item* 16.4–325, *line* 1, *change* Batten *to* Battan
p. 745, *item* 16.4–364, *line* 1, *change* Krisna, Rao *to* Krishna Rao
p. 751, *item* 16.4–384, *line* 1, *change* Lasarev *to* Lazarev
p. 769, *item* 16.4–443, *line* 1, *change* Egil *to* Eigil

No. 5. p. 925, *item* 16.5–144, *line* 1, *change* Avier'ianov *to* Aver'ianov
p. 927, *item* 16.5–148, *line* 1, *change* McCoy, John C. *to* McCoy, John G.
p. 1034, *line* 6, *change* S.H. No. 3 *to read:* Lindau/Harz, West Germany
p. 1049, *item* 16.5–562, *line* 1, *change* Nesterov *to* Nestorov
p. 1089, *item* 16.5–695, *line* 2, *delete* vodnogo balansa. [History of differentiated water balance equations.], *and insert* gidrologii [Contemporary mathematical methods in hydrology.]
p. 1089, *item* 16.5–696, *line* 2, *change* different *to* differentiated
p. 1092, *item* 16.5–706, *line* 6, *change* S.H. No. 1 *to read:* Shower effects on river levels
p. 1094, *item* 16.5–713, *line* 12, *change* Services *to* Service

No. 6. p. 1143, *item* 16.6–74, *line* 1, *change* Sirotenke *to* Sirotenko
p. 1176, *item* 16.6–185, *line* 1, *change* Coloquhoun *to* Colquhoun
p. 1184, *item* 16.6–210, *line* 11, *change* Spectrophometric *to* Spectrophotometric
p. 1256, *item,* 16.6–431, *line* 1, *change* Lorna *to* Lorne
p. 1294, *item* 16.6–545, *line* 1, *change* Speiter *to* Spreiter; *line* 2, change Dynamic *to* Dynamical
p. 1312, *item* 16.5–600, *line* 1, *change* Nikol'shiĭ *to* Nikol'skiĭ
p. 1343, *item* 16.6–703, *line* 1, *change* Durumn *to* Durum
p. 1348, *line* 13, *change* S.H. No. 3 *to read:* Cobourg, Canada

1127

o. 7. p. 1376, *item* 16.7–5, *lines* 2, 3 and 4 *should read:* Chast' 1–2, Makrotsirkuliatsionnyĭ . . . Kazakhstana. [Long range forecasting of the weather and climatic fluctuations of Kazakhstan, Pt. 1–2 : Large scale . . .]
p. 1377, *item* 16.7–9, *line* 1, *change* Bluthgen *to* Blüthgen
p. 1441, *item* 16.7–207, *line* 6, *change* define *to* definite
p. 1494, *item* 16.7–378, *line* 2, *change* ravinnoĭ *to* ravninnoĭ
p. 1526, *item* 16.7–482, *line* 2, *change* svoĭst v *to* svoĭstv
p. 1604, *line* 3, *change* Auvergne *to* Pyrenees

o. 8. p. 1666, *item* 16.8–40, *line* 1, *change* Glaser, Peter R. *to* Glaser, Peter E.
p. 1671, *item* 16.8–53, *line* 3, *change* Sbornik Rabot, No. 44–64, 1964 *to* Sbornik Rabot. No. 2 :44–64, 1964
p. 1819, *item* 16.8–533, *line* 1, *change* Bemergungen *to* Bemerkungen
p. 1859, *item* 16.8–657, *line* 1, *change* Hřebĭk *to* Hřebík

o. 9. p. 1915, *item* 16.9–45, *line* 13, *change* Galileo, Galilei *to* Galileo Galilei
p. 1930, *item* 16.9–95, *line* 1, *change* Wuretele *to* Wurtele
p. 2010, *item* 16.9–340, *line* 1, *change* Mardin *to* Hardin

o. 10. p. 2214, *item* 16.10–40, line 1, *change* Meteorolških *to* Meteoroloških; and in line 7, *change* medučasnvnih *to* medučasovnih
p. 2226, *item* 16.10–74, *line* 1, *change* historia *to* historie
p. 2236, *item* 16.10–107, *line* 3, *change* Radio troposphere *to* Radio and troposphere (All the following items have the same above made change: 16.10–113, –131, –139, –183, –235, –237, –238, –239, –246, –247 and –340.)
p. 2258, *item* 16.10–184, *line* 1, *change* Zupakhin *to* Zhupakhin
p. 2260, *item* 16.10–189, *line* 1, *change* Zhadanov *to* Zhdanov
p. 2267, *item* 16.10–209, *line* 1, *change* Karimberdyeva *to* Karimberdieva
p. 2291, *item* 16.10–285, *line* 2, *change* Radiolocating *to* Radar
p. 2333, *item* 16.10–414, *line* 1, *change* Bojarskaja *to* Boiarskaia
p. 2424, *item* 16.10–699, *line* 1, *change* Ceplech *to* Ceplecha

o. 11. p. 2511, *item* 16.11–52, *line* 1, *change* Apetroaiei *to* Apetroaei
p. 2608, *item* 16.11–370, *line* 1, *change* Skorosto *to* Skorost'
p. 2633, *item* 16.11–452, last *line, delete* comma between Tadzhik and S.S.R.
p. 2660, *item* 16.11–535, *line* 16, *change* S.H. No. 4 *to read:* Lindau/Harz, West Germany
p. 2667, *item* 16.11–561, *line* 12, *change* Auvergne Mts. *to* Pyrenees
p. 2672, *item* 16.11–578, *line* 1, *change* Maeda, K.-I *to* Imaeda, K.
p. 2681, *item* 16.11–610, *line* 1, *change* Masalenko *to* Moskalenko
p. 2700, *item* 16.11–669, *line* 1, *change* Murcrary *to* Murcray
p. 2712, *item* 16.11–708, *line* 12, *change* Auvergne Mts. *to* Pyrenees
p. 2749, section heading G5. Floating Ice—plus cross references *should be inserted* immediately prior to item No. 16.11–838

o. 12. p. 2789, *item* 16.12–3, *line* 8, *change* cast *to* case
p. 2988, *item* 16.12–658, *line* 1, *change* Koptev, V. L. *to* Koptev, V. I.
p. 3022, *item* 16.12–778, *line* 12, *change* Silica *to* Silicate

Wind Waves and Swell, 5(11), 1954

CUMULATIVE AUTHOR INDEX

Vol. 16, No. 1–12, Jan.–Dec. 1965

Note: In this index, author entries are arranged alphabetically and, under each author, the titles are likewise arranged alphabetically by the first word (other than an article) of the original title. The translated title is placed in brackets after foreign language titles, except for French, Italian, Spanish and Portuguese.

Some authors and titles mentioned in the body of an abstract have also been indexed.

Authors whose names begin with an article or preposition (van, de, di, le, la, etc.) are generally indexed under that article or preposition. Cross references indicate variations from that practice, or possible alternate entries.

All titles are listed under the first author. Co-authors, if any, are mentioned after the title. This simplifies arrangement of titles under any given author.

Titles have been shortened by omitting the end of long titles where feasible.

Separate indexes are provided for contract reports (by contract, grant or project number) and for translations (by author).

CUMULATIVE TRANSLATIONS INDEX

Vol. 16, Nos. 1–12, Jan.–Dec. 1965

- **Abele, M. K.**
  - Three-axis automatic photographic camera for satellite tracking [Transl. from Russ.], 16.10–10
- **Abetti, Giorgio**
  - The Sun [Transl. from Ital.], 16.4–9
- **Adam, N. V.**
  - Analytical representation of secular variation (*with others*) [Transl. from Russ.], 16.12–638
  - Reduction of mean daily geomagnetic field values to mean monthly values at middle latitudes (*with* **Sokolov, V. P.**) [Transl. from Russ.], 16.11–582
  - Vertical distribution of the geomagnetic field (*with others*) [Transl. from Russ.], 16.12–630
  - Western drift of the geomagnetic field (*with others*) [Transl. from Russ.], 16.11–583
- **Adrov, M. M.**
  - Hydrologic investigations near western Greenland [Transl. from Russ.], 16.4–96
- **Afanas'eva, V. I.**
  - Dependence of the energy of a magnetic storm on the distance to the corpuscular stream (Preliminary report) (*with* **Mogilevskiĭ, E. I.** and **Kalinin, Iu. D.**) [Transl. from Russ.], 16.11–602
  - Some elements of the theory of magnetic storms (*with* **Kalinin, Iu. D.** and **Mogilevskiĭ, E. I.**) [Transl. from Russ.], 16.12–652
- **Akademiia Nauk SSSR. Astronomicheskiĭ Sovet**
  - Artificial Earth satellites, automatic interplanetary stations and spaceships launched in the USSR in 1957–1962 [Transl. from Russ.], 16.10–10
  - Observations of Artificial Earth Satellites [Transl. from Russ.], 16.10–10
  - Optical tracking stations [Transl. from Russ.], 16.10–10
- **Akademiia Nauk SSSR. Institut Geografii**
  - Sukhoveis and drought control [Transl. from Russ.], 16.4–8
- **Alekhin, Iurii Mikhaĭlovich**
  - Short-range forecasting of low-land-river runoff [Transl. from Russ.], 16.1–7
- **Alimov, M. S.**
  - To the methodology of the study of evaporation of ground waters (*with* **Rasulev, T. A.**) [Transl. from Russ.], 16.5–441
- **Almar, I.**
  - International project for determining some geophysical data from observations of artificial satellites with a common baseline (*with* **Ill, M.**) [Transl. from Russ.], 16.10–10
- **Al'pert, Ia. L.**
  - Results of ionospheric investigations by means of coherent radio waves emitted from artificial Earth satellites [Transl. from Russ.], 16.11–637
  - Space physics with artificial satellites (*with* **Gurevich, A. V.** and **Pitaevskiĭ, L. P.**) [Transl. from Russ.], 16.11–14
- **Al'tshuler, L. I.**
  - World magnetic maps for the epoch 1960 (*with others*) [Transl. from Russ.], 16.12–657
- **Antonova, I. A.**
  - Highly sensitive electrostatic relay (*with others*) [Transl. from Russ.], 16.12–627
- **Apollov, B. A.**
  - Hydrological forecasting (*with* **Kalinin, G. P.** and **Komarov, V. D.**) [Transl. from Russ.], 16.11–12
- **Astapenko, P. D.**
  - Atmospheric processes in the high latitudes of the Southern Hemisphere [Transl. from Russ.], 16.7–42
  - Some characteristics of weather variations in summer over the polar plateau (*with* **Kuz'min, B. V.**) [Transl. from Russ.], 16.11–261
- **Aver'ianov, V. G.**
  - Contribution to the problem of climatic warming in Antarctica [Transl. from Russ.], 16.12–491
  - Description of the upper part of the snow cover in the interior of Antarctica [Transl. from Russ.], 16.10–272
- **Avsiuk, Iu. N.**
  - Results of magnetic observations along the Pionerskaya-Pole of relative inaccessibility traverse (*with* **Koptev, V. L.**) [Transl. from Russ.], 16.12–658

- **Babarykin, V. K.**
  - Albedo of the surface of Antarctic ice (*with others*) [Transl. from Russ.], 16.11–291
  - Latitudinal measurements of the intensity of cosmic rays in the stratosphere (*with others*) [Transl. from Russ.], 16.12–606

Bardin, V. I.
"Productivity" of the coast of East Antarctica (*with* **Shil'nikov, V. I.**) [Transl. from Russ.], 16.11–838
Basharinov, A. E.
Measurements of the brightness temperature of Venus at 8 mm (*with others*) [Transl. from Russ.], 16.8–629
Beliaev, V. P.
Some results of the experimental investigations of the atmospheric turbulence using radiosondes (*with others*) [Transl. from Russ.], 16.12–362
Belikovich, V. V.
Determinations of the electron concentration profile in the lower ionosphere from the absorption frequency variation (*with* **Imkina, M. A.** and **Rodygin, L. V.**) [Transl. from Russ.], 16.12–550
Bel'kovich, O. I.
Some statistical problems in meteor radio astronomy (*with* **Beskin, L. N.**) [Transl. from Russ.], 16.12–706
Belov, I. F.
Possibility of measuring the distribution of polarization of solar radio emission in the absence of an eclipse [Transl. from Russ.], 16.9–687
Ben'kova, N. P.
Geomagnetic eccentric dipole (*with* **Vinnikova, T. L.** and **Tiurmina, L. O.**) [Transl. from Russ.], 16.12–631
Ionospheric investigations of the schooner *Zarya:* the F_2 layer in the equatorial region (*with* **Vasil'ev, K. N.**) [Transl. from Russ.], 16.12–551
Ionospheric observations on the schooner "Zarya": magnetic field at the level of the ionosphere (*with* **Vasil'ev, K. N.** and **Nguen, Kim Hue**) [Transl. from Russ.], 16.7–652
L-variations of the geomagnetic field and of the ionosphere according to data from Soviet stations (*with others*) [Transl. from Russ.], 16.11–591
Berezin, Iu. V.
Some results of experimental investigation of radio wave absorption in the ionosphere [Transl. from Russ.], 16.12–552
Betin, V. V.
Ice research in the Baltic Sea during the International Geophysical Year (*with* **Prebrazhenskiĭ, Y. V.**) [Transl. from Russ.], 16.2–66
Bischoff, Karlheinz
Winter anomaly in the E layer [Transl. from Russ.], 16.12–553
Bokanenko, L. I.
Subglacial relief and thickness of the Lazarev ice shelf (*with* **Avsiuk, Iu. N.**) [Transl. from Russ.], 16.10–814
Bovsheverov, V. M.
Procedure for measuring solar limb image motion, and preliminary measurements (*with* **Kallistratova, M. A.**) [Transl. from Russ.], 16.9–327
Braginskiĭ, S. I.
Kinematic models of the Earth's hydromagnetic dynamo [Transl. from Russ.], 16.12–636
Britaev, A. S.
On ozone correlation with meteorological conditions [Transl. from Russ.], 16.12–11
Budyko, M. I.
Evaporation under natural conditions [Transl. from Russ.], 16.2–17
Buzdalin, Iu. I.
Hydrological conditions in the Newfoundland Banks and Labrador areas in 1960 (*with* **Elizarov, A. A.**) [Transl. from Russ.] 16.4–96

Chalov, P. I.
Isotope ratio of U^{234}/U^{238} in natural wate and its use in nuclear geochronology (*wit* **Tuzova, T. V.** and **Musin, Ia. A.**) [Transl from Russ.], 16.11–851
Chao, Pai-lin
Mechanism of ice-forming nuclei and artificial super-cooled cloud and fog [Transl from Chin.], 16.8–346
Charakhch'ian, A. N.
Decrease in cosmic-ray intensity in the stratosphere during geomagnetic storms (*wit.* **Charakhch'ian, T. N.**) [Transl. fron Russ.], 16.11–569
Energy spectrum of galactic cosmic ray (computed) (*with* **Charakhch'ian, T. N.** [Transl. from Russ.], 16.12–607
Chebotarev, A. I.
On the methods of evaluation of possibl changes of streamflow under the effect o agriculture (*with* **Kharchenko, S. I.** [Transl. from Russ.], 16.12–832
Chebotarev, G. A.
On the dynamical limits of the solar syster [Transl. from Russ.], 16.9–681
Cherednichenko, V. I.
Origin of atomic nitrogen λ5003 Å emissio in auroras [Transl. from Russ.], 16.12–59
Chernikov, A. A.
Radar studies of echoes from a clear sk [Transl. from Russ.], 16.12–109
Chou, Hsiu-chi
Statistical theory of the microphysical mechanisms of formation of rain in war clouds [Transl. from Russ.], 16.2–308
Chu, K'o-chen
Characteristics of our country's climate an their relationship with the production c grain and other foodstuff [Transl. fror Chinese], 16.12–56

Chubukov, L. A.
Bioclimatic characteristics of the basic zones of northern development [Transl. from Russ.], 16.6–453

Danilkin, N. P.
Ionization of the *F* region of the ionosphere over Moscow during the solar eclipse of 1961 [Transl. from Russ.], 16.12–554
Use of both components of a magnetically split signal in analysis of the ionospheric effect of the solar eclipse of 1961 (*with* **Ryss, I. K.**) [Transl. from Russ.], 16.12–555
Dauvillier, Alexandre
Cosmic dust [Transl. from French], 16.10–6
Degtiarev, G. M.
Radiation reflected from the surface of the open sea (*with* **Sorokin, A. A.** and **Men'shov, Iu. A.**) [Transl. from Russ.], 16.11–292
Denisov, N. G.
Wave diffraction on an inhomogeneous finite screen [Transl. from Russ.], 16.12–556
Divari, N. B.
Dust concentration in the upper layers of the Earth's atmosphere [Transl. from Russ.], 16.12–207
Polarization measurements of the zodiacal light (*with* **Krylova, S. N.** and **Moroz, V. I.**) [Transl. from Russ.], 16.12–742
Dmitriev, N. K.
Auroras at Lazarev Station [Transl. from Russ.], 16.11–545
Dolganov, L. V.
Air temperature at Mirny and at stations in the interior [Transl. from Russ.], 16.11–310
Determination of absolute humidity at low temperatures [Transl. from Russ.], 16.11–356
Determination of mean monthly temperatures in the absence of sufficient observations [Transl. from Russ.], 16.11–304
New aerometeorological methods in the Antarctic (*with* **Zhdanov, L. A.**) [Transl. from Russ.], 16.10–56
Dorman, L. I.
Character of the spatial-temporal distribution of solar cosmic rays in interplanetary space (*with* **Miroshnichenko, L. I.**) [Transl. from Russ.], 16.12–609
Effect of chromospheric flares in the neutron component of cosmic rays on magnetically quiet days and during large flares accompanied by type-III absorption (*with* **Ivanov, V. I.** and **Kolomeets, E. V.**) [Transl. from Russ.], 16.12–670
Some characteristics of cosmic ray anisotropy during geomagnetic storms (*with* **Inozemtseva, O. I.**) [Transl. from Russ.], 16.8–519
Drobzhev, V. I.
First results of investigations of the movements of inhomogeneities in the ionosphere over Alma-Ata (*with* **Zelenkov, V. E.** and **Zelenkova, I. A.**), 16.9–595
Dubinski, Iu.
Study of the variability of the general ionizing component of cosmic rays (*with* **Khaloupka, L.**) [Transl. from Russ.], 16.12–611
Dubrovin, L. I.
Accuracy of snow measurements in Antarctica (*with* **Petrov, V. I.**) [Transl. from Russ.], 16.10–57
Air currents in the snow and firn layer of Lazarev Ice Shelf [Transl. from Russ.], 16.10–387
Durasova, M. S.
Observation of weak disturbances of solar radio emission in years of minimum solar activity by the "quasi-zero" method (*with others*) [Transl. from Russ.], 16.12–692
Dvoriashin, A. S.
Characteristics of the X-radiation of proton flares [Transl. from Russ.], 16.12–671
Dziubenko, N. I.
Change of auroral forms with a change of solar activity [Transl. from Russ.], 16.12–588
East-west movements of auroras and azimuths of quiescent arcs from observations at Tixie Bay [Transl. from Russ.], 16.12–598

Egiazarov, I. V.
Effect of nongraded sediment and of accumulation of large bed material in the channel on the movement and discharge of sediment [Transl. from Russ.], 16.10–826
Elizarov, A. A.
On the vertical stability of water layers on the fishing grounds of the Newfoundland Banks [Transl. from Russ.], 16.4–96
England, J.
Cloud photography during the eighth voyage of the diesel-electric ship Ob' [Transl. from Russ.], 16.11–384
Enukashvili, I. M.
On the problem of a kinetic theory of gravitational coagulation in spatially heterogeneous clouds [Transl. from Russ.], 16.12–429
On the solution of the kinetic coagulation equation [Transl. from Russ.], 16.11–369
Eremin, N. N.
Total and scattered radiation in Antarctica [Transl. from Russ.], 16.10–58
Eskin, L. I.
Surface currents along the South Africa-Antarctica profile (*with* **Ledenev, V. G.**) [Transl. from Russ.], 16.12–786

Faraponova, G. P.
Relation of transparency of the free atmosphere to certain meteorological characteristics [Transl. from Russ.], 16.12–517

Fatkullin, M. N.
Estimate of the vertical density distribution of S_q-currents [Transl. from Russ.], 16.11–494

Relationship between S_q variations and ionospheric parameters (preliminary communication) (*with* **Fel'dshtein, Ia. I.**) [Transl. from Russ.], 16.12–560

Fedorov, E. P.
Cause of the apparent "bifurcation" of the free nutation period (*with* **Iatskiv, Ia. S.**) [Transl. from Russ.], 16.8–589

Fedosov, M. V.
Investigation of formation conditions of primary productivity in the Northwest Atlantic [Transl. from Russ.], 16.4–96

Feigel'son, E. M.
Radiative input of heat into the atmosphere [Transl. from Russ.], 16.11–281

Fesenkov, V. G.
Optical properties of the dust cloud surrounding the Earth [Transl. from Russ.], 16.8–593

Fomin, Luch Mikhailovich
Dynamic method in oceanography [Transl. from Russ.], 16.8–1

Fonarev, G. A.
Distribution of electromagnetic variations with depth in the sea [Transl. from Russ.], 16.8–531

Fuks, N. A.
Mechanics of aerosols [Transl. from Russ.], 16.3–3

Gachechiladze, R. G.
State of the ionosphere at middle latitudes during magnetic storms associated with anomalous absorption in the polar cap (*with* **Khocholava, G. M.**) [Transl. from Russ.], 16.11–498

Galkin, A. I.
Seasonal variations of the diurnal pattern in the ionization density of the F2-layer according to data from some polar stations [Transl. from Russ.], 16.11–499

Garazha, V. I.
Optical properties of the Martian atmosphere in the ultraviolet (*with* **Ianovitskiĭ, E. G.**) [Transl. from Russ.], 16.9–709

Gavrilin, B. L.
Dynamic equations in the quasi-nondivergent approximation [Transl. from Russ.], 16.12–174

Geiger, Rudolf
Climate near the ground [Transl. from Ger.], 16.1–5

Glushneva, I. N.
Wavelength dependence of the albedo of Venus and of Jupiter in the ultraviolet [Transl. from Russ.], 16.8–630

Golovin, A. M.
On the theory of stationary cumulus clouds [Transl. from Russ.], 16.12–430

Gopasiuk, S. I.
Relationship between photospheric and chromospheric processes in the active region during flares (*with* **Ogir', M. B.** and **Tsap, T. T.**) [Transl. from Russ.], 16.12–753

Gorelik, A. G.
Relation of the liquid-water content and intensity of precipitation to the radar reflectivity of the meteorological entity with various parameters of the drop-size distribution (*with* **Smirnova, G. A.**) [Transl. from Russ.], 16.12–111

Statistical characteristics of the radar echo as a function of the dynamic processes and microstructure of the meteorological entity (*with* **Mel'nichuk, Iu. V.** and **Chernikov, A. A.**) [Transl. from Russ.], 16.12–112

Gorin, B. N.
Reverse discharges and their application to lightning (*with* **Stekol'nikov, I. S.**) [Transl. from Russ.], 16.11–472

Govorukha, L. S.
First results of drifting snow measurements by means of a "Tsiklon" drifting snow meter (*with* **Kirpichev, E. F.**) [Transl. from Russ.], 16.10–392

Grebenskiĭ, A. S.
Some characteristics of radio emission sources on the Sun associated with spot groups (*with* **Molchanov, A. P.**) [Transl. from Russ.], 16.12–694

Gringauz, K. I.
On the results of tests with three-electrode charged particle traps in the second radiation belt and in the outermost belt of charged particles (*with others*) [Transl. from Russ.], 16.11–607

Gudzenko, L. I.
Some dynamic properties of cyclic solar activity (*with* **Chertoprud, V. E.**) [Transl. from Russ.], 16.9–724

Gul'medov, Kh.
Photographic observations of the structure and diffusion of meteor trails (*with* **Iushkevich, E. S.**) [Transl. from Russ.], 16.11–691

Some data on turbulence of the upper atmosphere from optical observations of meteor trails at Ashkhabad and Kazan [Transl. from Russ.], 16.12–364

Gurevich, A. V.
Supersonic motion of a body in plasma (*with* **Pitaevskiĭ, L. P.**) [Transl. from Russ.], 16.12–680

Gushchin, G. P.
Seasonal variations in latitudinal distribution of atmospheric ozone [Transl. from Russ.], 16.12–11

Gus'kov, A. A.
Wind distribution at various heights in the atmosphere over the Antarctic [Transl. from Russ.], 16.11–348

Gutman, L. N.
Stationary, axially-symmetric model of a cumulus cloud taking into account the evaporation of water droplets [Transl. from Russ.], 16.11–386

Iakovkin, N. A.
H_α radiation field in prominences [Transl. from Russ.] (*with* **Zel'dina, M. Iu.**), 16.9–754

Iashkov, V. Ia.
Spectrum of the motion of the Earth's poles [Transl. from Russ.], 16.8–588

Ignatov, V. S.
Experimental instrumental auroral observations in the region of the South geomagnetic pole [Transl. from Russ.], 16.11–548
Radar observations of auroras at Vostok Station [Transl. from Russ.], 16.11–549
Study of the structure of snow and firn cover in Antarctica by the thermal method [Transl. from Russ.], 16.12–474
Visual auroral observations at Vostok Station [Transl. from Russ.], 16.12–589

Il'ich, G. K.
Diffuse reflection of light from the optically thick layers of scattering media (*with* **Ivanov, A. P.**) [Transl. from Russ.], 16.12–513

Iudovich, L. A.
Frequency of appearance of anomalous ionization in the F2 layer at high latitudes [Transl. from Russ.], 16.12–563
Spatial distribution of anomalous ionization in the F2-layer at high latitudes [Transl. from Russ.], 16.11–505

Ivanov, K. G.
Horizontal inhomogeneities of the Earth's electrical conductivity and predominant directions of S_q variations of Earth currents (*with* **Mikerina, N. V.**) [Transl. from Russ.], 16.12–620
Interaction between advancing shock waves and strong discontinuities in space in the Earth's neighborhood [Transl. from Russ.], 16.12–623
Map of distribution of the sign of the Z-component of the SSC field over the Earth's surface [Transl. from Russ.], 16.12–629

Ivanov, V. N.
Turbulent energy and its dissipation in the lower atmospheric layer [Transl. from Russ.], 16.11–331

Ivanov, V. V.
Magnetic effect and shock wave of a meteor (*with* **Medvedev, Iu. A.**) [Transl. from Russ.], 16.8–643
Scattering of light in an atmosphere of finite optical thickness [Transl. from Russ.], 16.8–434

Ivanov-Kholodnyĭ, G. S.
Investigation of electron concentration in the lower part of the ionosphere (D region): review [Transl. from Russ.], 16.11–506

Izrael', Iu.
Tritium content of glaciers (*with others*) [Transl. from Russ.], 16.12–818

Kachurin, L. G.
Trajectories of turbulent heated streams immersed in the atmosphere (*with* **Bekriaev, V. I.** and **Dydina, G. P.**) [Transl. from Russ.], 16.7–283

Kaminer, N. S.
Irregular variations in the intensity of the neutron component of cosmic rays caused by a temperature effect (*with* **Ilgach, S. F.** and **Khadakhanova, T. S.**) [Transl. from Russ.], 16.8–282
Temperature effect of the cosmic-ray neutron component (*with* **Ilgach, S. F.** and **Khadakhanova, T. S.**) [Transl. from Russ.], 16.12–613
Temperature effect of the cosmic-ray neutron component during a period of high solar activity (*with* **Ilgach, S. F.** and **Khadakhanova, T. S.**) [Transl. from Russ.], 16.12–326

Karimova, G. U.
Some results of ozone observations in the Arctic in 1958 [Transl. from Russ.], 16.12–11

Katasev, L. A.
Photographic methods in meteor astronomy [Transl. from Russ.], 16.5–40

Kazachevskaia, T. V.
Measurement of X-ray and ultra-violet radiation by thermo-luminescent phosphor, $CaSO_4(Mn)$ (*with others*) [Transl. from Russ.], 16.2–153

Kazimirovskiĭ, E. S.
Geomagnetic control of east-west drift in the F region of the ionosphere (*with* **Kiun, G. I.**) [Transl. from Russ.], 16.12–564

Kerblaĭ, T. S.
Determination of the distance of the hop of a radio wave propagating in a horizontally inhomogeneous ionosphere (*with* **Kovalevskaia, E. M.**) [Transl. from Russ.], 16.7–110

Khrgian, A. Kh.
Meridional circulation of the atmosphere and the planetary transfer of atmospheric ozone (*with* **Kuznetsov, G. I.**) [Transl. from Russ.], 16.12–11

Klimenkov, A. I.
Hydrological observations in the northwest Atlantic in spring-summer 1960 (*with* **Pakhorukov, V. I.**) [Transl. from Russ.], 16.4–96
Koblents, Ia. P.
Effect of the relief of the Antarctic shelf on the development of outlet glaciers [Transl. from Russ.], 16.12–817
Kokourov, V. D.
Analysis of fading of a reflected signal [Transl. from Russ.], 16.7–111
Phenomenon of scattered reflections as an experimental basis for the study of the inhomogeneous structure of the ionosphere [Transl. from Russ.], 16.11–509
Kondrat'ev, Kirill Ia.
Meteorological investigations with rockets and satellites [Transl. from Russ.], 16.11–15
Radiative heat exchange in the atmosphere [Transl. from Russ.], 16.12–5
Korobkov, Iu. S.
Some results of investigations of the E_s layers in the Pacific Ocean area (*with* **Pisareva, V. V.**) [Transl. from Russ.), 16.12–569
Kort, V. G.
Heat exchange of Antarctic waters [Transl. from Russ.], 16.11–806
Kostin, S. I.
Is the Brikner (Brückner) cycle real? [Transl. from Russ.], 16.12–493
Kotliakov, V. M.
Indications of seasonal snow deposits in the central regions of Antarctica [Transl. from Russ.], 16.11–834
Results of a study of the crystalline forms of precipitation in the Mirny Region (*with* **Kuznetsov, M. A.**) [Transl. from Russ.], 16.10–386
Snow accumulation in the coastal belt of East Antarctica from 1957–1961 [Transl. from Russ.], 16.11–418
Structure of the seasonal snow layer in the coastal regions of Antarctica in relation to conditions of its deposition [Transl. from Russ.], 16.12–466
Kovrova, A. M.
Distribution of the vertical wind velocity gradient with height at Mirny [Transl. from Russ.], 16.10–59
Kozhevnikov, N. I.
Temporal variation in area of a sunspot group [Transl. from Russ.], 16.9–725
Kozyrev, Nikolai A.
Atmosphere of Mercury [Transl. from Russ.], 16.10–684
Krasnopevtsev, Iu. V.
Conference on problems of nuclear meteorology [Transl. from Russ.], 16.11–222
Kritskiĭ, S. N.
On fluctuations in level of closed water bodies (*with* **Menkel', M. F.**) [Transl. from Russ.], 16.12–827
Krotikov, V. D.
Radio emission temperature of the Moon and Jupiter at 70.16 cm (*with others*) [Transl. from Russ.], 16.9–692
Kruchinin, Iu. A.
Dynamics of the snow surface of the Lazarev Ice Shelf [Transl. from Russ.], 16.11–419
Dynamics of the Trolltung Ice Shelf (*with* **Koblents, Ia. P.**), [Transl. from Russ.], 16.10–815
Morphology of the ice shelf in the Lazarev station region [Transl. from Russ.], 16.12–810
Some data on the temperature regime of the Lazarev Ice Shelf [Transl. from Russ.], 16.11–832
Krugliakova, G. I.
Magnetic stability of rockets and criteria for its definition [Transl. from Russ.], 16.11–586
Krupchatnikova, T. P.
Turbulence in the proximity of jetstreams [Transl. from Russ.], 16.12–365
Krymskiĭ, G. F.
Diffusion mechanism of diurnal cosmic-ray variations [Transl. from Russ.], 16.7–629
Kuchment, L. S.
Modern mathematical methods in hydrology [Transl. from Russ.], 16.12–831
Kuklin, G. V.
Some problems concerning the mathematical analysis of geophysical data (*with* **Luzov, A. A.**) [Transl. from Russ.], 16.8–111
Kuli-Zade, D. M.
Profiles of the stronger Fraunhofer lines in the spectrum, Pt. 1 [Transl. from Russ.], 16.9–752
Kulikov, K. A.
Fundamental constants of astronomy [Transl. from Russ.], 16.10–5
Kuperov, L. P.
Radio wave propagation in the 14–600 kcs range according to observations at Byrd Station in the Antarctic [Transl. from Russ.], 16.11–34
Kupetskiĭ, V. N.
Effect of stationary polyn'yas on cyclonic circulation in the Antarctic [Transl. from Russ.], 16.12–275
Kurt, V. G.
Neutral hydrogen in the Earth's environs and in planetary space [Transl. from Russ.], 16.2–195
Kuz'minykh, V. D.
Model of an average facula [Transl. from Russ.], 16.8–656
Kuznetsov, E. S.
Numerical solution of an integral equation on the theory of light scattering in the

atmosphere (*with* **Ovchinskiĭ, B. V.**) [Transl. from Russ.], 16.12–519
Kuznetsov, G. I.
Some conclusions on ozone problems drawn from ozone observations during the International Geophysical Year [Transl. from Russ.], 16.12–11

Laĭkhtman, David L'vovich
Physics of the boundary layer of the atmosphere [Transl. from Russ.], 16.7–41
Lastochkin, V. P.
Secular decrease in the radio flux from Cassiopeia-A in the centimeter region (*with* **Stankevich, K. S.**) [Transl. from Russ.], 16.9–694
Spectrum of radio emission from Cygnus-A (*with* **Sorin, Iu. M.** and **Stankevich, K. S.**) [Transl. from Russ.], 16.9–695
Lavrova, E. V.
Spatial distribution of ionospheric disturbances in the F_2 layer [Transl. from Russ.], 16.12–570

  - Lunar-diurnal geomagnetic variations an their relation to the level of activity o solar wave emission (*with* **Katsiashvili N. A.** and **Khocholava, G. M.**) [Transl from Russ.], 16.12–646
- **Nozdriukhin, V. K.**
  - Spring-summer temperature regime of th snow and firn layer at Vostok Statio [Transl. from Russ.], 16.11–421

- **Ochakovskiĭ, Iu. E.**
  - Fourth Mediterranean expedition aboard th research ship Akademik S. Vavilov [Transl from Russ.], 16.3–622
- **Odintsova, I. N.**
  - Estimate of the spectrum of ionizing sola radiation during the flare of Aug. 22, 1958 according to vertical soundings of th ionosphere [Transl. from Russ.], 16.7–57
- **Okulov, Iu. I.**
  - Dirac's monopole and some problems of neutrino physics and geophysics [Transl. fro Russ.], 16.8–575
- **Orlova, Valentina Vladimirovna**
  - Western Siberia [Transl. from Russ.], 16.10–32
- **Ozmidov, R. V.**
  - On the large-scale characteristics of horizontal ocean current velocities [Transl from Russ.], 16.11–798

Some statistical characteristics of velocity and density fluctuations in the ocean (*with* **Iampol'skii, A. O.**) [Transl. from Russ.], 16.12–788

Pal'gov, N. N.
Determining the thickness of mountain glaciers by the "balance method" [Transl. from Russ.], 16.12–811
Pédelaborde, Pierre
The monsoon [Transl. from Fr.], 16.5–10
Petrov, V. N.
Cyclical character of snow accumulation on the ice shelves of East Antarctica (*with* **Barkov, N. I.**) [Transl. from Russ.], 16.11–422
Variations of snow accumulation in Antarctica from 1891 to 1955 [Transl. from Russ.], 16.11–423
Pikel'ner, S. B.
Theory of heating of the active and undisturbed chromosphere (*with* **Livshits, M. A.**) [Transl. from Russ.], 16.9–736
Plakhotnik, A. F.
Some new data on the thermal regime of waters in the Northeast Pacific [Transl. from Russ.], 16.12–346
Polushkin, V. A.
On the most efficient way of using scientific information materials in the field of oceanography [Transl. from Russ.], 16.11–40
Ponomarenko, L. S.
Hydrochemical studies in the Newfoundland area (*with* **Istoshina, M. A.**) [Transl. from Russ.], 16.4–96
Potapova, N. I.
Distribution of electron density with normal and anomalous ionization in the subarctic region (*with* **Iudovich, L. A.**) [Transl. from Russ.], 16.12–576
Pozĭgun, V. L.
Computation of the turbidity factor of the ionosphere [Transl. from Russ.], 16.12–577
Praus, Oldrzich
Observations of whistlers [Transl. from Russ.], 16.11–649
Pudovkin, I. M.
Application of the $S(O,h)$ function to ΔT anomalies (*with* **Kolesova, V. I.**) [Transl. from Russ.], 16.12–626
Spatial structure of the geomagnetic field and some aspects of the inner structure of the Earth [Transl. from Russ.], Pt. 2, 16.11–588; Pt. 3, 16.12–633
Zero isoline of the vertical gradient of ΔT and its use in the interpretation of magnetic anomalies (*with* **Kolesova, V. I.**) [Transl. from Russ.], 16.11–585

Raspopov, O. M.
Experiment in recording geomagnetic field variations with a period of less than 5 seconds (*with* **Chicherina, N. D.**) [Transl. from Russ.], 16.11–584
Rense, H.
Accuracy of satellite tracking with the large universal instrument of the Geodetic Institute in Potsdam [Transl. from Russ.], 16.10–10
Reshchikova, A. A.
Turbulence in jetstreams in the clear sky [Transl. from Russ.], 16.12–393
Richardson, I. D.
Estimación de los recursos marinos frente a la costa Atlantica de America del Sur [Transl. from Eng.], 16.6–87
Romanova, L. M.
Limiting case of the path distribution function of photons emerging from a thick light-scattering layer [Transl. from Russ.], 16.12–345
Rotanova, N. M.
Distribution of electrical conductivity within the Earth as indicated by D_{st} variations [Transl. from Russ.], 16.12–621
Rusin, Nikolaĭ Petrovich
Meteorological and radiational regime of Antartica [Transl. from Russ.], 16.8–5
Methods of climate control, USSR (*with* **Flit, Liia Abramovna**) [Transl. from Russ.], 16.5–61

Samardzhiev, D.
New method of investigating movements in the nighttime E-layer (*with* **Nestorov, G.**) [Transl. from Russ.], 16.7–576
Schwarzbach, Martin
Climates of the past: an introduction to paleoclimatology [Transl. from Ger.], 16.4–5
Scientia, [Peking]
Conference on Hydrological Forecasts [Transl. from Chinese], 16.7–69
National Climatology Conference [Summary of discussions] [Transl. from Chinese], 16.6–33
Semenova, T. N.
Zooplankton in the area of the Newfoundland Banks in spring 1960 [Transl. from Russ.], 16.4–96
Serafimov, K. B.
Actual heights of maximum electron concentration in stratified formations in the intermediate E-F region [Transl. from Russ.], 16.8–489
Sergeev, A. A.
Essays on the history of aviation medicine [Transl. from Russ.], 16.6–7
Serikov, M. I.
Snow accumulation on the Lazarev Ice Shelf [Transl. from Russ.], 16.12–475
Shabanskiĭ, V. P.
Radial drift of particles from the radiation belts of the Earth caused by hydromag-

netic waves in the magnetosphere [Transl. from Russ.], 16.8–568

Sharonov, V. V.
Nature of the planets [Transl. from Russ.], 16.5–8

Shatkhin, Kh. Z.
Ionospheric-tropospheric relationships [Transl. from Russ.], 16.12–234

Shchegolev, D. E.
Geometrical method of processing satellite tracking data for purposes of cosmic triangulation [Transl. from Russ.], 16.10–10

Shcherbakova, E. Ia.
Climate of the U.S.S.R., Issue 5, Eastern Siberia [Transl. from Russ.], 16.7–45

Shesterikov, N. P.
Tides in the Lazarev Station region (*with* **Dubrovin, L. I.**) [Transl. from Russ.], 16.10–809

Shil'nikov, V. I.
Volume and number of icebergs in the Antarctic (from 44° to 168°E) [Transl. from Russ.], 16.12–819

Shirmamedov, M.
Synchronous observations of anomalous reflection coefficients from the F2 region of the ionosphere on spaced receiving antennas [Transl. from Russ.], 16.11–530

Shklovskiĭ, I. S.
Nature of solar X-ray emission [Transl. from Russ.], 16.9–730

Shliakhov, V. I.
Method for measuring radiation balance from an airplane [Transl. from Russ.], 16.10–296

Shnaĭdman, V. A.
Application of the boundary layer method to the determination of the parameters of turbulence in the free atmosphere [Transl. from Russ.], 16.12–367

Shneerov, B. E.
Ozone observations during the Third Soviet Antarctic Expedition in 1958 [Transl. from Russ.], 16.12–11

Shuleĭkin, V. V.
Theory of ocean waves [Transl. from Russ.], 16.4–7

Shumskiĭ, P. A.
Principles of structural glaciology [Transl. from Russ.], 16.2–9

Shupiatskii, A. B.
Radar scattering by non-spherical particles [Transl. from Russ.], 16.1–100

Simonenko, A. N.
Dimensions and configuration of the Earth's shadow from observations of the lunar eclipse of July 6, 1963 [Transl. from Russ.], 16.12–713

Simonov, I. M.
Lakes in the Schirmacher Ponds (*with* **Fedotov, V. I.**), 16.11–853

Slonim, Iu. M.
Nature and localization of chromospheri flares [Transl. from Russ.], 16.12–755

Smirnov, I. P.
On the meridional profile of the zonal atmospheric circulation (*with* **Kazakova, L. L.** [Transl. from Russ.], 16.11–256

Sovetskaia Antarkticheskaia Ekspeditsii 1955–
Soviet Antarctic Expedition Information Bu letin, Vol. 1 [Transl. from Russ.], 16.4–5

Sytinskiĭ, A. D.
Problem of using microseisms in weathe forecasting at Mirny [Transl. from Russ. 16.11–262
Relationship between geotectonics and sola activity [Transl. from Russ.], 16.11–69
Synchronous disturbances of atmospheric ci culation in the Southern and Norther Hemispheres and their cause [Trans from Russ.], 16.10–265

Tarkhov, E. N.
Rules for the construction of archeomagnet curves [Transl. from Russ.], 16.12–641

Teifel', V. G.
Photometric properties of the red spot c Jupiter [Transl. from Russ.], 16.10–697

Teplitskaia, R. B.
Determination of the excitation temperatu in the solar atmosphere [Transl. fro Russ.], 16.9–718

Titov, V. B.
Propagation and character of the tidal wa in the Antarctic Ocean (*with* **Shesteriko N. P.**) [Transl. from Russ.], 16.11–820

Tiutiunov, I. A.
Introduction to the theory of the formatic of frozen rocks [Transl. from Russ. 16.7–49

Travin, V. I.
Soviet fishery investigations and fishing the Northwest Atlantic (*with* **Pechenik, N.**) [Transl. from Russ.], 16.4–96

Trestman, A. G.
New aspects of river runoff calculatio [Transl. from Russ.], 16.11–13

Troitskaia, V. A.
Classification of rapid pulsations of the ma netic field and Earth currents [Trans from Russ.], 16.11–601

Troitskiĭ, V. S.
Nonuniformity in the properties of the t layer of the lunar surface [Transl. fro Russ.], 16.8–624

Tsedilina, E. E.
Investigation of the inhomogeneous structu of the ionosphere from the results of rad observations of Cosmos 1, Cosmos 2, a Cosmos 11 on coherent frequencies (*wi* **Kharybina, A. A.**) [Transl. from Russ. 16.11–642

Space modulation of the Doppler frequency shift of radio waves received from artificial Earth satellites [Transl. from Russ.], 16.12–683

verskoĭ, B. A.
Dynamics of the radiation belts of the Earth, Pt. 2 [Transl. from Russ.], 16.12–665

khov, S. B.
Engineering investigations of snow cover between Komsomolskaya and Amundsen-Scott Station [Transl. from Russ.], 16.11–425

smanov, R. F.
Coincidence of the Antarctic low with sub-Antarctic submarine basins [Transl. from Russ.], 16.10–276

aĭsberg, O. L.
Density of N_2^+ ions in high auroral rays (*with* **Shuĭskaia, F. K.**) [Transl. from Russ.], 16.12–599

asil'eva, T. N.
Parameters of the linear dependence of f_oF2 and M-3000-F2 on solar activity [Transl. from Russ.], 16.12–584
Various types of dependencies of f_oF2 on solar activity (*with* **Kerblaĭ, T. S.**) [Transl. from Russ.], 16.12–585

einik, A. I.
Thermodynamics: a generalized approach [Transl. from Russ.], 16.8–34

ilenskiĭ, I. M.
Rate of vertical movement of the lower ionosphere (*with* **Podlipalin, B. I.**) [Transl. from Russ.], 16.7–587

innichenko, N. K.
Application of a thermoanemometer on an aircraft [Transl. from Russ.], 16.12–130

itinskiĭ, Iu. I.
Problem of active longitudes on the Sun [Transl. from Russ.], 16.12–751

itkevich, V. V.
Two-component model of the solar supercorona [Transl. from Russ.], 16.8–659

itolnieks, R.
Relationship between the appearance of noctilucent clouds and the E_s layer [Transl. from Russ.], 16.12–528

iushkov, P. V.
Bolometric pyrheliometer as a standardization instrument for absolute measurements of direct solar radiation (*with* **Skliarov, Iu. A.**) [Transl. from Russ.], 16.9–145

Voronin, A. L.
Polarization phenomena in the magnetoactive ionosphere [Transl. from Russ.], 16.11–538
Refraction of VHF/UHF waves in the ionosphere [Transl. from Russ.], 16.12–586

Voronov, P. S.
Attempt at a reconstruction of the Antarctic ice cap of the epoch of the Earth's maximum glaciation [Transl. from Russ.], 16.12–809

Vsekhsviatskiĭ, S. K.
Physical characteristics of comets [Transl. from Russ.], 16.5–9
Physical characteristics of 1961–1963 comets [Transl. from Russ.], 16.11–695

Vul'fson, N. I.
Influence of stationary heat sources on convection in an unstable stratified atmosphere (*with* **Gutman, L. N.**) [Transl. from Russ.], 16.12–397

Wohlfeil, L.
Device for photographic tracking of artificial satellites [Transl. from Russ.], 16.10–10

Zeĭtunian, Kh. N.
Hydrodynamic calculation of lee waves [Transl. from Russ.], 16.11–245

Zhdanov, L. A.
Meridional aerological profile between the tropics of the Southern and Northern Hemispheres [Transl. from Russ.], 16.10–236
Relationship between atmospheric circulation in the Northern and Southern Hemispheres [Transl. from Russ.], 16.10–267
Typification of synoptic processes over the coast of East Antarctica [Transl. from Russ.], 16.10–189

Zhelezniakov, V. V.
Model of the lower chromosphere based on radio data [Transl. from Russ.], 16.8–658
On the configuration of the magnetic field of Saturn [Transl. from Russ.], 16.9–713

Zhongolovich, I. D.
Review of results of determining parameters of the Earth's gravitational field from satellite tracking data [Transl. from Russ.], 16.10–10

Zhulina, E. M.
Influence of cosmic radio noise on the reception of information on board an artificial Earth satellite and at ground stations [Transl. from Russ.]. 16.8–109

CUMULATIVE SUBJECT INDEX

Note: This index has been alphabetically arranged by computer. Words should be looked up strictly by letter; for example **IGY** appears under "IG" rather than under "In" (for International Geophysical Year). It should also be noted that punctuation marks, such as periods and hyphens, are considered letters which precede the alphabet; thus **U. S.** precedes **UHF**, **Solar-atmospheric** comes after **Solar wind**, etc. Subject Headings beginning with numbers are listed at the end of the alphabet.

A

AAS-NASA Symposium on the Physics of Solar Flares, Greenbelt, Md., Oct. 1963
  AAS-NASA Symp. on the Physics of Solar Flares, 16.5–13
Ablation phenomena

CUMULATIVE GEOGRAPHIC INDEX

In this index of geographical places there are three major sections:

- **A. Hemispheres and Regions**
- **B. Continents**
- **C. Oceans, Seas and Islands (including Antarctic and Arctic)**

An alphabetical or dictionary type of arrangement is followed for all divisions and subdivisions of these major groups. For example, in Section B, the continents are arranged alphabetically as follows:

1. **Africa**
2. **Asia**
3. **Australasia (Australia, Indonesia and New Zealand)**
4. **Europe**
5. **North America**
6. **South America**

Within each continent the regions or main topographical features are listed alphabetically, followed by the countries in alphabetical order. No attempt has been made to distinguish between political and geographical regions or sub-regions.

In Section **C** the principal oceans and seas and their respective divisions have been arranged alphabetically. Islands not naturally associated with one or another of the continents have been assigned to the body of water in which they are located. Seas which fall entirely within one continent have been assigned to that continent.

Australasia includes **Australia, Indonesia** and **New Zealand; Japan** and the **Philippines** are under **Asia, Greenland** is under **North America,** and **Iceland** is under **Europe.**

Antarctic Regions include the Antarctic continent and the bordering seas and have been arbitrarily assigned to Section **C** on **Oceans, Seas and Islands.**

All references to the whole of the **U.S.S.R.** (Russia) are found in the section under **Europe.** Places definitely **in Asiatic U.S.S.R.** (Siberia, Kazakhstan, etc.) are listed under the appropriate country or area under **Asia.**

A. HEMISPHERES AND REGIONS

Eastern Hemisphere, 16.3–125; 16.10–261
Northern Hemisphere, 16.2–178, –236, –254; 16.3–118, –125, –210, –211, –220, –223, –310, –676; 16.4–199, –201, –202, –278; 16.5–335, –408; 16.6–127, –249, –255, –320, –667; 16.7–300, –402; 16.8–207, –327; 16.9–367, –371, –376, –379; 16.10–257, –263, –801; 16.11–164, –169, –258, –280, –393; 16.12–27, –247, –330, –336, –337, –340, –343, –347 to –349, –374, –441, –647
Southern Hemisphere, 16.3–210, –211; 16.4–58; 16.5–332; 16.6–16, –325; 16.7–384; 16.8–51; 16.9–114; 16.11–257, –350, –394; 16.12–260, –267
Equatorial Regions, 16.8–541
Eurasia, 16.2–54; 16.3–332; 16.5–247; 16.7–214; 16.10–240; –270
Latin America, 16.1–18
Mediterranean Region, 16.2–56; 16.3–281; 16.6–449; 16.7–212; 16.8–222; 16.9–400, –465; 16.11–246

B. CONTINENTS

1. AFRICA

Africa (general), 16.1–67; 16.3–16; 16.4–280; 16.7–20, –665; 16.8–29
Central Africa, 16.8–219
East Africa, 16.4–196; 16.9–524
North Africa, 16.4–22
Northeast Africa, 16.5–397
Tropical Africa, 16.9–252

West Africa, 16.8–219; 16.10–300

Algeria, 16.2–464; 16.3–366
  Colomb-Bechar, 16.3–424
  Hammaguir, 16.5–179; 16.10–336
  Tamanrasset, 16.5–575; 16.8–509
Angola
  Luanda, 16.12–220
Chad, 16.7–549
Congo, Republic of the
  Congo Estuary, 16.10–786
  Léopoldville, 16.9–113
  Lwiro, 16.11–563
  Ruzizi River Valley, 16.11–361
Egypt (United Arab Republic), 16.7–331; 16.8–263; 16.9–420; 16.12–295
  Giza, 16.7–331, –332
  Helwan, 16.8–269
Ethiopia (Abyssinia)
  Addis Ababa, 16.10–584
Gambia, 16.7–457
Ghana, 16.2–131
Guinea
  Guinea Coast, 16.11–398
  Kankan, 16.6–452
Gulf of Guinea, 16.1–438
Kenya
  Muguga, 16.12–159
  Nairobi, 16.7–443, –553, –584
Libya
  Cyrenaica, 16.1–264
  Sirte, 16.4–734
  Tripoli, 16.4–405
Malawi (former Nyasaland), 16.10–835
Mozambique
  Lourenço Marques, 16.12–220
Niger
  Agadez, 16.5–575
Nigeria, 16.2–131; 16.3–207; 16.4–431; 16.11–525
  Ibadan, 16.4–90; 16.5–557; 16.10–476
Nile River, 16.11–431
Rhodesia
  Mazoe, 16.4–467
Sahara, 16.10–503
South Africa, Republic of, 16.1–8; 16.3–296; 16.4–410; 16.9–568
  Cape of Good Hope, 16.4–663
  Cape Province
    George, 16.4–470
  Durban, 16.4–606; 16.8–314
  Wellwood, 16.10.377
Southwest Africa
  Tsumeb, 16.11–535
Sudan, 16.3–72; 16.7–87; 16.8–345; 16.8–707; 16.12–385
Swaziland, 16.1–158
Uganda, 16.7–489
  Entebbe, 16.7–443
United Arab Republic, *see* **Egypt**

2. ASIA

ASIA (general), 16.4–308; 16.6–130; 16.9–381; 16.12–505

C. OCEANS, SEAS AND ISLANDS

(Including Antarctic and Arctic)

Antarctic Regions
  Antarctic Ocean, 16.1–441; 16.2–82; 16.4–52, –671; 16.5–82; 16.6–616, –642; 16.9–822; 16.10–61, –781, –785, –794, 809; 16.11–278, –794, –795, –800, –806, –820, –844; 16.12–304, –786, –819, –820
  Bouvet Island, 16.6–120
Antarctic Seas
  Davis Sea, 16.8–283; 16.11–291
Antarctica, 16.1–46, –49, –106, –250, –501; 16.2–80, –81, –83 to –85, –218, –251, –478; 16.3–31, –42, –47, –48, –300, 16.4–45 to –50, –638, –721, –724, –726; 16.5–11, –60, –80 to –84, –163, –452, –475, –478, –530, –559; 16.6–437, –438, –485,

–677; 16.7–37, –42, –65, –68, –256, –555, –801; 16.8–5, –6, –56, –484; 16.9–26, –576; 16.10–50, –54, –57, –60, –65, –66, –122, –148, –189, –255, –272, –276, –296, –387, –813 to –815; 16.11–23, –31, –35, –261, –304, –310, –348, –418, –419, –422, –423, –425, –548, –553, –832, –834, –838, –855; 16.12–29 to –31, –275, –460, –466, –475, –491, –644, –658, –803, –809, –810, –817
Central Antarctica, 16.5–85, –144
East Antarctica, 16.7–503
Western Antarctica, 16.3–45

Adélie Land, 16.11–543
  Dumont d'Urville, 16.4–267; 16.9–27, –649
Amundsen Scott Station, 16.12–310
Antarctic (Palmer) Peninsula, 16.5–682
Australian Antarctic Territory, 16.7–63
Byrd Station, 16.1–48, –394; 16.3–509; 16.5–518; 16.8–450, –453, –463, –551; 16.9–612; 16.11–34, –831
Cape Hallett, 16.3–448
  Hallett Station, 16.3–498; 16.9–24
Davis, 16.7–63, –388
Ellsworth Land, 16.5–682
Falkland Islands, 16.5–78
Filchner Ice Shelf, 16.4–49
Filchner Ice Shelf area, 16.9–547
Graham Land, 16.5–78
Lazarev, 16.5–480; 16.10–809; 16.11–545
Lazarev Ice Shelf, 16.10–387; –814; 16.11–419, –832; 16.12–475, –810
Maudheim, 16.2–256
Maudheim Glacier, 16.11–832
Mawson, 16.8–558
McMurdo Sound, 16.3–614; 16.5–392; 16.6–388, –460
McMurdo Station, 16.4–255; 16.5–79, –83, –438; 16.12–131
Macquarie Island, *see under* Tasmania
Mirny, 16.1–391; 16.3–297; 16.5–474; 16.7–144; 16.8–558; 16.9–25, –109; 16.10–56, –59, –64, –265, –386; 16.11–262, –287, –649
Molodeshnaya region, 16.10–63
Norway Station, 16.3–41
Oazis, 16.2–204
Pioneerskaya, 16.7–144
Queen Maud Land, 16.7–64
  Roi Baudouin Base, 16.2–310; 16.7–478
Schirmacher Ponds, 16.11–853
Scott Base, 16.7–656
South Pole, 16.3–43; 16.5–476, –479; 16.7–328, –477, –594
  South Pole Station, 16.3–507; 16.10–319
Syowa Base, 16.3–44
Thiel Mts., 16.2–472
Victoria Land, 16.5–690; 16.6–643
  Lake Bonney, 16.4–51; 16.5–693
  Lake Vanda, 16.2–327; 16.5–693; 16.9–845
Vostok, 16.1–47, –390; 16.3–392; 16.11–356, –421, –549; 16.12–474, –589
Wilkes Station, 16.8–463
Arctic Regions, 16.9–433
  Arctic, 16.1–41, –42, –106, –411; 16.2–80, –386; 16.3–37, –39, –451, –483, –484; 16.4–44; 16.5–559; 16.6–306; 16.7–37, –38, –330, –555; 16.8–6, –267, –268, –317; 16.9–377, –449, –480, –519; 16.10–45, –46, –50, –51; 16.11–33, –79, –553, –594; 16.12–341, –527, –644

METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS

MALCOLM RIGBY, Editor

Volume 16, 1965

AMERICAN
METEOROLOGICAL
SOCIETY
1919

Published monthly at Prince and Lemon Streets, Lancaster, Pa., by the AMERICAN METEOROLOGICAL SOCIETY, 45 Beacon Street, Boston, Mass. 02108.

Printed and issued by: Lancaster Press, Inc.

TABLE OF CONTENTS

Vol. 16, 1965

Number	Month	Page	Item Number
1	Jan.	1	16.1–1 to 16.1–507
2	Feb.	177	16.2–1 to 16.2–673
3	March	409	16.3–1 to 16.3–693
4	April	639	16.4–1 to 16.4–743
5	May	883	16.5–1 to 16.5–714
6	June	1119	16.6–1 to 16.6–725
7	July	1375	16.7–1 to 16.7–820
8	Aug.	1653	16.8–1 to 16.8–711
9	Sept.	1901	16.9–1 to 16.9–859
10	Oct.	2201	16.10–1 to 16.10–843
11	Nov.	2493	16.11–1 to 16.11–869
12	Dec.	2789	16.12–1 to 16.12–843
	Jan.–Dec.	3069	**Author and Subject Indexes**

METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS

MALCOLM RIGBY, Editor

Volume 16, 1965

Published monthly at Prince and Lemon Streets, Lancaster, Pa., by the AMERICAN
METEOROLOGICAL SOCIETY, 45 Beacon Street, Boston, Mass. 02108.

Printed and issued by: Lancaster Press, Inc.

TABLE OF CONTENTS

Vol. 16, 1965

Number	Month	Page	Item Number
1	Jan.	1	16.1–1 to 16.1–507
2	Feb.	177	16.2–1 to 16.2–673
3	March	409	16.3–1 to 16.3–693
4	April	639	16.4–1 to 16.4–743
5	May	883	16.5–1 to 16.5–714
6	June	1119	16.6–1 to 16.6–725
7	July	1375	16.7–1 to 16.7–820
8	Aug.	1653	16.8–1 to 16.8–711
9	Sept.	1901	16.9–1 to 16.9–859
10	Oct.	2201	16.10–1 to 16.10–843
11	Nov.	2493	16.11–1 to 16.11–869
12	Dec.	2789	16.12–1 to 16.12–843
	Jan.–Dec.	3069	**Author and Subject Indexes**

SELECTED LIST OF SERIAL PUBLICATIONS MOST FREQUENTLY CITED IN METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS

These serial publications regularly contain an abundance of material on meteorology and geoastrophysics. The form used in *MGA* is given below.

Acta Climatologica, Szeged, Hungary
Acta Geophysica Polonica, Warsaw
Acta Meteorologica Sinica, Peking
Advances in Geophysics, N. Y.
Advances in Space Science and Technology, N. Y.
Agricultural Meteorology, Amsterdam
Akademiia Nauk SSSR, Doklady, Ser. Matematika, Fizika
Akademiia Nauk SSSR. Izvestiia. Fizika Atmosfery i Okeana
Akademiia Nauk SSSR. Izvestiia. Fizika Zemli
Akademiia Nauk SSSR. Izvestiia. Ser. Geogr.
Akademiia Nauk SSSR. Izvestiya. Atmospheric and Oceanic Physics
Akademiia Nauk SSSR. Institut Okeanologii, Trudy
Akademiia Nauk SSSR. Mezhduvedomstvennyĭ Geofizicheskiĭ Komitet, Rezul'taty Issledovaniĭ po Programme MGG [Various series]
Akademiia Nauk Ukrainskoĭ RSR. Morskoĭ Gidrofizicheskiĭ Institut, Trudy
American Geophysical Union, Geophysical Monographs
American Geophysical Union, Transactions
American Meteorological Society, Bulletin
Angewandte Meteorologie, Berlin
Annales d'Astrophysique, Paris
Annales de Géophysique, Paris
Annali di Geofisica, Rome
Archiv für Meteorologie, Geophysik und Bioklimatologie, Ser. A [and] Ser. B, Vienna
Arkiv för Geofysik, Stockholm
Astronomical Journal, New Haven, Conn.
Astronomicheskiĭ Zhurnal, Moscow
Astrophysical Journal, Chicago
Australian Journal of Physics, Melbourne
Australian Meteorological Magazine, Melbourne
Beiträge zur Geophysik, Leipzig
Beiträge zur Physik der Atmosphäre, Frankfurt a.M.
Bulgaria. Institut po Khidrologiia i Meteorologiia, Izvestiia
Bulletin de Géophysique, Montreal
Canada. Meteorological Branch, Circular
Canadian Journal of Physics, Ottawa
Ciel et Terre, Brussels
Dal'nevostochnyĭ Nauchno-Issledovatel'skiĭ Gidrometeorologicheskiĭ Institut, Vladivostok, Trudy
Deutsche Hydrographische Zeitschrift, Hamburg
France. Comité Central d'Océanographie et d'Etude des Côtes, Cahiers Océanographiques
France. Météorologie Nationale, Monographies
Geofisica et Meteorologia, Genoa
Geofysiske Publikasjoner, Oslo
Geograficheskoe Obshchestvo SSSR, Izvestiia
Geomagnetism and Aeronomy, Wash., D. C.
Geomagnetizm i Aeronomiia, Moscow
Geophysica, Helsinki
Geophysical Journal, London
Geophysical Magazine, Tokyo
Germany (Federal Republic). Deutscher Wetterdienst, Berichte
Germany (Federal Republic). Deutscher Wetterdienst, Mitteilungen
Great Britain. Meteorological Office, Scientific Papers
Hamburg. Seewetteramt, Einzelveröffentlichungen
Helsinki. Universitet. Meteorologiska Institutet, Mitteilungen
Hidrotehnica, Gospodărirea Apelor, Meteorologia, Bucharest
Hungary. Országos Meteorológiai Intézet, Hivatalos Kiadványai
Időjárás, Budapest
Indian Journal of Meteorology and Geophysics, Delhi
International Journal of Biometeorology, Amsterdam
Japan. Science Council. Ionosphere Research Committee, Report of Ionosphere and Space Research in Japan
Journal de Mécanique et de Physique de l'Atmosphère, Paris
Journal de Recherches Atmosphériques, Clermont-Ferrand
Journal of Agricultural Meteorology, Tokyo
Journal of Applied Meteorology, Boston
Journal of Geomagnetism and Geoelectricity, Kyoto, Japan
Journal of Geophysical Research, Wash., D. C.
Journal of Glaciology, Cambridge, England
Journal of Hydrology, Amsterdam
Journal of Marine Research, New Haven
Journal of Meteorological Research, Tokyo
Journal of the Atmospheric Sciences, Boston
Khidrologiia i Meteorologiia, Sofia
Kiev. Ukraine. Nauchno-Issledovatel'skiĭ Gidrometeorologicheskiĭ Institut, Trudy
Kosmicheskie Issledovaniia, Moscow
Leningrad. Glavnaia Geofizicheskaia Observatoriia, Trudy
Leningrad. Gosudarstvennyĭ Gidrologicheskiĭ Institut, Trudy
Leningrad. Nauchno-Issledovatel'skiĭ Institut-Aeroklimatologii, Trudy
Limnology and Oceanography, Lawrence, Kan.
Marine Observer, London
Meteoritika, Moscow
Meteorological Magazine, London
Meteorological Monographs, Boston
Meteorological Society of Japan, Tokyo, Journal
Meteorologické Zprávy, Prague
Météorologie, Paris
Meteorologiia i Gidrologiia, Moscow
Meteorologische Rundschau, Berlin
Monthly Weather Review, Wash., D. C.
Moscow. Gosudarstvennyĭ Okeanograficheskiĭ Institut, Trudy
Moscow. Tsentral'naia Aerologicheskaia Observatoriia, Trudy
Moscow. Tsentral'nyĭ Institut Prognozov, Trudy
Nagoya. Univ. Research Institute of Atmospherics, Proceedings
Netherlands Journal of Sea Research, Den Helden
New Zealand Journal of Geology and Geophysics, Wellington
Oceanographical Society of Japan, Tokyo, Journal
Oceanography and Marine Biology, London
Okeanologiia, Moscow
Planetary and Space Science, Oxford
Problemy Arktiki i Antartiki, Leningrad
Progress in Oceanography, Oxford
Przeglad Geofizyczny, Warsaw
Pure and Applied Geophysics, Basel
Radio Science, Wash., D. C.
Reviews of Geophysics, Wash., D. C.
Rivista di Meteorologia Aeronautica, Rome
Royal Meteorological Society, London, Quarterly Journal
Rumania. Institutul Meteorologic, Bucharest, Culegere de Lucrări
Sendai, Japan. Tohoku Univ., Science Reports, 5th Ser., Geophysics
Soviet Hydrology: Selected Papers, Wash., D. C.
Space Science Reviews, Dordrecht, Holland
Sredneaziatskiĭ Nauchno-Issledovatel'skiĭ Gidrometeorologicheskiĭ Institut, Trudy
Studia Geophysica et Geodaetica, Prague
Tellus, Stockholm
Water Resources Research, Wash., D. C.
Weather, London
Weatherwise, Boston
Wetter und Leben, Vienna
World Meteorological Organization, Technical Notes
World Meteorological Organization. WMO Bulletin
Zeitschrift für Meteorologie, Berlin

TABLE OF CONTENTS

Meteorological and Geoastrophysical Abstracts

Volume 16, INDEXES, Jan.–Dec. 1965

Errata .... ii–iii

List of Bibliographies Published in Vol. 1, No. 1, Jan. 1950–Vol. 12, No. 12, 1964 iv

CUMULATIVE INDEXES

CUMULATIVE AUTHOR INDEX 3069
List of authors with titles of articles and number of entry

CUMULATIVE TRANSLATIONS INDEX 3393

CUMULATIVE SUBJECT INDEX 3404
List of subjects with authors and number of entry

CUMULATIVE GEOGRAPHIC INDEX 3635
List of geographic places used as subjects and number of entry

LIST OF PERIODICALS REGULARLY ABSTRACTED .... Cover 3
